EDUCATION

University of Minnesota

Bachelor of Science in Computer Science | GPA: 3.96

Minneapolis, MN

Expected Spring 2028

- Relevant Coursework: Algorithms and Data Structures, Operating Systems, Formal Languages and Automata Theory, Machine Architecture, Software Engineering, Computational Linear Algebra, Discrete Mathematics

EXPERIENCE

Royal Bank of Canada

Software Developer Intern

Jun 2026 – Aug 2026

Minneapolis, MN

- Developed and unit-tested backend features for a Premium Savings product in **Java** (JUnit, Gradle) within a platform supporting **\$7.5B+** in deposits.
- Reworked the enrollment workflow to streamline client onboarding, reducing processing time by **~30%**.
- Collaborated in an Agile/Scrum team with engineers, QA, and product partners to deliver features across sprints.

University of Minnesota

CS Undergraduate Teaching Assistant

Jan 2025 – Present

Minneapolis, MN

- Lead weekly lab sessions for **30+ students** on data structures and algorithms in **Java**, debugging code and clarifying core concepts.
- Review student submissions for correctness and efficiency, reinforcing industry practices like testing and clean code style.

Freelance Work

Fullstack Developer & System Administrator

Sep 2022 – Present

Minneapolis, MN

- Built a script-sharing marketplace with a **TypeScript** frontend and a **Java/Jetty** backend, scaling to **1,000+** users at **99.9%** uptime.
- Developed responsive mortgage and inquiry forms with real-time validation and **REST** integration to a **Spring** backend, lifting form completion by **35%**.
- Engineered a custom Minecraft plugin in **Java** for a **4,000+** player server, improving performance under high concurrency and adding quality-of-life features.

PROJECTS

Burrow | *React Native, TypeScript, Kotlin, Ktor, PostgreSQL*

Sep 2024 – Present

- Led a 5-person team to design and ship a study-group matching platform live on the **App Store**.
- Won **first place** at the University of Minnesota startup competition over **20+** competing teams.
- Architected a **Kotlin/Ktor** backend serving **1,000+** API requests daily.
- Grew adoption **60%+** in the first year through live demos at lecture halls reaching **200+** students per session.

AllerSight | *React Native, Python, OpenCV, Kotlin*

Apr 2026

- Built a **top-10** hackathon allergen-detection app using a vision-capable **LLM** to identify foods from photos and cross-reference an allergen database into personalized safety reports.
- Engineered a real-time **OpenCV** pipeline to flag restaurant hygiene issues from a live camera feed.
- Automated allergen auditing of local restaurant menus via web scraping, surfacing unsafe dining options without manual menu review.

LEADERSHIP

Social Coding

Treasurer

Sep 2025 – Present

Minneapolis, MN

- Help lead the largest Computer Science club at the University of Minnesota with **100+ active members**.
- Grew semester-over-semester membership by **30%** through social media campaigns, campus partnerships, and first-year outreach.

TECHNICAL SKILLS

Languages: Java, Kotlin, Python, TypeScript, C++, SQL, Bash

Backend: Ktor, Spring Boot, Node.js, REST, GraphQL, JWT/OAuth 2.0

Frontend: React, React Native, Next.js, TailwindCSS

Infra/Tools: AWS, GCP, Docker, Kubernetes, CI/CD, PostgreSQL, Redis, MongoDB, Git, JUnit, Gradle
